FIRDAUS CHE KOB

(+60) 11 1930 5227 | firdauschekob@gmail.com | firdauschekob.com

PROFESSIONAL SUMMARY

Analytical and meticulous data analyst with 4+ years of business intelligence experience and a current MSc in Data Science. Skilled in gathering business requirements, developing ETL modules and data models, statistical analysis, and building dashboards and MIS reports in Tableau and Power BI on Microsoft SQL-based platforms. Proven ability to collaborate with global stakeholders and present insights clearly.

CERTIFICATIONS

- Microsoft Certified: Fabric Data Engineer Associate
- Microsoft Certified: Fabric Analytics Engineer Associate
- Microsoft Certified: Power BI Data Analyst Associate
- Salesforce Certified: Tableau Data Analyst

PROFESSIONAL EXPERIENCE

Associate Developer, Business Intelligence | Valiram Group **APR 2024 – PRESENT**

- Built an end-to-end medallion architecture (Bronze/Silver/Gold) in Databricks, covering ingestion (Lakeflow Connect), transformation (Spark Declarative Pipelines), and data modelling, with Genie agents and Genie One enabling self-service BI and AI-driven analytics for business users.
- Serve as the main owner of the cloud data warehouse, ETL pipelines, and BI layer supporting 40+ brands and 700+ retail stores across finance, inventory, sales, and supply chain.
- Led the ground work for the company migration from Azure Synapse to Microsoft Fabric, re-platforming data pipelines and models with minimal disruption to downstream reporting.
- Gather business requirements from international brand managers and translate them into functional specifications, KPI frameworks, and technical designs for BI reporting.
- Develop and implement ETL modules (Fabric Data Factory, Azure Synapse, Tableau Prep), perform data mapping from source systems to target repositories, and monitor and tune pipeline performance to improve data freshness and reliability.
- Design analytics-ready data models (Silver/Gold layers) in Microsoft Fabric and build executive dashboards and MIS reports in Tableau and Power BI, with test plans validating 100% accuracy before rollout.

Data Analyst, Business Intelligence | Alpro Pharmacy **MAR 2023 – MAR 2024**

- Conducted data exploration and statistical analysis of raw transactional data across sales, inventory, and operations, translating findings into actionable commercial insights.
- Partnered with stakeholders to gather requirements, assess data availability and readiness, and define KPI frameworks aligned with business objectives.
- Developed Tableau dashboards delivering near real-time insights, enabling faster data-driven decision-making by business users.
- Performed root-cause analysis on warehouse and ERP data issues, proposing system and process improvements that enhanced data accuracy and operational efficiency.
- Delivered ad-hoc analyses under tight deadlines and presented findings to support strategic commercial and operational decisions.

Undergraduate Research Fellow | King's College London **JUL 2020 – SEP 2020**

- Analyzed large-scale advertising interaction datasets using SQL to identify behavioral patterns driving engagement and click-through rates on interactive mobile advertisements.
